Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 30 December 2003.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

- 6) Other: _____.

DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the second cylindrical rim extending downward from the ceiling (claim 3) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 4, 8 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Odet et al. (5,141,138). Odet et al. disclose, in figs. 1, 3 and 5, a flip top closure comprising a base portion 1 having a skirt 6, a floor 9 having an opening 14, a pour spout 10 extending only partially around the pour opening thereby leaving a portion 13 of the pour opening where there is no spout; and a cap portion 3, having a skirt 6, a ceiling 19, a cylindrical rim 18 forming a seal with the base portion floor when the cap portion is in the close position; wherein the spout has anti-drip lip 12, and the spout extends less than 360 degrees around of the pour opening.

Claim Rejections - 35 USC § 103

4. Claims 5-7 and 10-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Odet et al.. It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the pouring spout extending degrees as claimed, since it has been held that discovering a optimum value of a result effective variable involves only routine skill in the art. In re Boesch, 617 F 2d 272.205 USPQ 215 (CCPA 1980).

5. Claim 3 rejected under 35 U.S.C. 103(a) as being unpatentable over Odet et al. in view of Beckstrom et al. (4,475,274).

Art Unit: 3754

Beckstrom et al. teach, in fig. 3, a cap portion having two cylindrical rims extending downward from the ceiling.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the Odet cap portion with two cylindrical rim, as taught by Beckstrom et al., in order to enhance the sealing of the cap portion in the closed position.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to LIEN TM NGO whose telephone number is 571-272-4545. The examiner can normally be reached on Monday through Friday from 8:30 AM -6:00 PM.
